3. Shank

4. Hand

5. Head or neck

6. Head or neck

The ciliary body is the part of the eye that surrounds the iris. It connects the iris to the choroid. The ciliary body comprises the ciliary muscles (which help to change the shape of the lens) and the ciliary processes.

7. Abdomen or pelvis

8. Abdomen or pelvis

9. Head or neck

10. Ring finger

The ring finger is considered the weakest because it shares an extensor muscle with the middle and little fingers, which limits its independent movement.
